

Master of Engineering in Engineering Technology (International Program)

Curriculum Title

Master of Engineering in Engineering Technology (International Program)

Degree Title

Master of Engineering (Engineering Technology)

Applicants' Qualifications

1. The applicant must hold a bachelor's degree in engineering, science or a related field that is accepted by the SIIT Executive Committee.
2. The applicant must have a cumulative GPA of at least 2.75 or sufficient relevant research or work experience as specified by the SIIT Executive Committee.
3. The applicant must submit an official score of one of the following English language tests:
 - TU-GET,
 - TOEFL (official or institutional),
 - IELTS, or
 - an English test conducted by SIIT.

The score must not be older than two years from the date on which it was issued to the date of the application for admission to the program.

Admission Requirements

1. The applicant must pass a selection interview conducted by an SIIT Committee consisting of at least 3 faculty members.
2. Admission to the program requires approval by the SIIT Executive Committee.

Remark: Students who have inadequate knowledge in some areas, may be required to take additional courses in those areas.

Academic System

1. All courses are conducted in English. An academic year is divided into 2 semesters. Each semester consists of 16 weeks. Courses may be offered for a summer semester of at least 6 weeks duration. The total number of lecture hours required for the summer semester is the same as that for the regular semester. Enrollment for summer courses is optional.

2. Curriculum

2.1 Study Plan

The syllabus consists of prescribed coursework (24 credits) and thesis (15 credits). A total of 39 credits is required for completion of the program.

2.2 Thesis

2.2.1 A student can register for a thesis after he or she has studied for at least 2 regular semesters or has gained 12 credits with a minimum cumulative GPA of 3.00.

2.2.2 Thesis Committee

The Thesis Committee consists of the thesis advisor, who is a faculty member of SIIT, as the chairperson, the thesis co-advisor (if appointed), and one or more members. There must be at least one member who is not affiliated with SIIT. The total number of the committee members who are not the thesis advisor or co-advisor must not be less than the total number of the thesis advisor and co-advisor. In addition, the number of committee members from SIIT must not be less

than the number of external committee members. The Thesis Committee is appointed by the SIIT Executive Committee.

2.2.3 Thesis Final Defense Committee

The Thesis Final Defense Committee consists of the same members as the Thesis Committee. However, the defense must be chaired by a thesis committee member who is not the advisor or co-advisor.

2.2.4 External Examiner

The external examiner must be appointed by the SIIT Executive Committee.

Period of Study

The maximum period of study to complete the program is 4 academic years.

Registration

The student must enroll in courses and/or register for a thesis totaling at least 6 credits but not more than 12 credits per semester.

Academic Performance Evaluation and Graduation

1. Evaluation of Academic Performance

- 1.1 A credit will be earned only if the grade is "S" or not lower than grade "C". Grade "D" or "F" will be included in the calculation of the grade point average of each semester and for the cumulative grade point average.
- 1.2 Any student, who gets grade "U", "D" or "F" in a compulsory taught course, can re-enroll in that course only one more time. His or her student status will be terminated if he or she still fails to obtain grade "S" or at least "C" for the course in the second enrollment.
- 1.3 Thesis assessment is classified into 2 grades:
 - S (Satisfactory)
 - U (Unsatisfactory).

Students must get grade "S" for their theses.

2. Graduation Requirements

To graduate, students must meet the following minimum requirements:

- 2.1 Twenty-four credits of taught courses required by the curriculum with an accumulative GPA of at least 3.00. In addition, the grade of each of these courses must be at least "C".
- 2.2 Fifteen credits of thesis work and passing a thesis defense.
- 2.3 Approval of the thesis by the external examiner and the thesis committee.
- 2.4 At least one paper on thesis findings has been accepted for publication in a national journal approved by the Academic Review Committee of SIIT, or at least two papers have been accepted for publication in international conference proceedings.
- 2.5 Having satisfied one of the following English proficiency requirements:
 - A TOEFL (official or institutional) score of at least 550 (paper-based), or 213 (computer-based), or 79 (internet-based), or
 - An IELTS score of at least 6.0, or
 - A TU-GET score of at least 550.

Curriculum

1. Total credits requirement

A total of 39 credits is required for completion of the program.

2. Structure and Components

2.1	Core Courses	24 Credits
2.1.1	Compulsory Courses	9 Credits
2.1.2	Specialized Courses	12 Credits
	from one of the following five majors of study, i.e.,	
	1. Chemical Engineering	
	2. Civil Engineering	
	3. Electrical Engineering	
	4. Industrial Engineering and Manufacturing Systems	
	5. Mechanical Engineering	
2.1.3	Elective Courses	3 Credits
2.2	Master's Thesis	15 Credits
	Total	39 Credits

3. Course Coding System

Sirindhorn International Institute of Technology sets up the course as follows:

- 3.1 Subject code consists of letters and numbers.
- 3.2 ICT indicates subjects in Information and Communication Technology for Embedded Systems.
 SE indicates subjects in Supply Chain System Engineering and Logistics Program.
 ET indicates subjects in Engineering Technology Program.
 ES indicates basic subjects.
- 3.3 Numbers are composed of 3 digits.
- The first unit-place-digit indicates the order of subject.
 - The tenth-place-digit indicates the subject group.
 - The hundredth-place-digit indicates the graduate program.

4. List of courses in the curriculum

4.1 Core Courses, 24 credits

4.1.1 Compulsory Courses, 9 credits

Code	Course Title	Credits
		(lecture-practice-self study hrs)
ES805	Research Methodology	2(2-0-6)
ES806	Research Seminar	1(0-3-1)
ET601	Computer-Aided Engineering	3(3-0-9)
ET600	Numerical Methods for Engineers	3(3-0-9)
	or	
ICT600	Computational Mathematics	3(3-0-9)
	or	
SE600	Decision Making and Optimization	3(3-0-9)

4.1.2 Specialized Courses, 12 credits from one of the following majors

4.1.2.1 Major: Chemical Engineering

Code	Course Title	Credits
		(lecture-practice-self study hrs)
ET610	Special Topic in Chemical Engineering	3(3-0-9)
ET611	Current Topics in Chemical Engineering	3(3-0-9)
ET61x	Technical Elective	3(3-0-9)
ET61x	Technical Elective	3(3-0-9)

4.1.2.2 Major: Civil Engineering

Code	Course Title	Credits
		(lecture-practice-self study hrs)
ET620	Special Topic in Civil Engineering	3(3-0-9)
ET621	Current Topics in Civil Engineering	3(3-0-9)
ET62x	Technical Elective	3(3-0-9)
ET62x	Technical Elective	3(3-0-9)

4.1.2.3 Major: Electrical Engineering

Code	Course Title	Credits (lecture-practice-self study hrs)
ET630	Special Topic in Electrical Engineering	3(3-0-9)
ET631	Current Topics in Electrical Engineering	3(3-0-9)
ET63x	Technical Elective	3(3-0-9)
ET63x	Technical Elective	3(3-0-9)

4.1.2.4 Major: Industrial Engineering and Manufacturing Systems

Code	Course Title	Credits (lecture-practice-self study hrs)
ET640	Special Topic in Industrial Engineering and Manufacturing Systems	3(3-0-9)
ET641	Current Topics in Industrial Engineering and Manufacturing Systems	3(3-0-9)
ET64x	Technical Elective	3(3-0-9)
or		
SE611-7		
ET64x	Technical Elective	3(3-0-9)
or		
SE611-7		

4.1.2.5 Major: Mechanical Engineering

Code	Course Title	Credits (lecture-practice-self study hrs)
ET650	Special Topic in Mechanical Engineering	3(3-0-9)
ET651	Current Topics in Mechanical Engineering	3(3-0-9)
ET65x	Technical Elective	3(3-0-9)
ET65x	Technical Elective	3(3-0-9)

4.1.3 Elective Course, 3 Credits

Code	Course Title	Credits (lecture-practice-self study hrs)
ET6xx	Technical Elective	3(3-0-9)
or		
SE611-7		

4.2 Master's Thesis

Code	Course Title	Credits
ES800	Master's Thesis	15

Course Descriptions

Compulsory Courses

ES800	Master's Thesis	15 credits
ES805	Research Methodology	2(2-0-6)
Concept of scientific and technological research; Statistics for research planning and research study; Data collection and data analysis; Interpretations, conclusions and recommendations of research results.		
ES806	Research Seminar	1(0-3-1)
Student-faculty interaction on advanced research topics.		
ET600	Numerical Methods for Engineers	3(3-0-9)
Programming concepts and techniques; Modern programming languages and computational tools for engineering problems; Numerical methods as applied to practical engineering problems; Introduction to finite element methods.		
ET601	Computer-Aided Engineering	3(3-0-9)
Computational methods for engineering modeling and simulation; Geometric modeling; Grid generation; Finite element methods; Finite volume methods; Applications of numerical methods to advanced engineering problems.		

ICT600 Computational Mathematics 3(3-0-9)

Set theory; Relations; Formal proof methods; Finite automata; Regular expressions; Context-free grammar; Pushdown automata; First order logic; Theories related to counting, graphs and networks; Interplay between continuous models and their solution via discrete processes; Vector spaces, basis, dimension, eigenvalue problems, diagonalization, inner products, unitary matrices; Introduction to applied statistics and its application to intelligent systems; Introduction to supervised statistical learning including discrimination methods.

SE600 Decision Making and Optimization 3(3-0-9)

Fundamental optimization tools for quantitative analysis to develop modeling and decision-making skill in management sciences; Linear programming; Integer programming; Nonlinear programming; Goal programming; Game theory; Markov chains; Queuing theory and decision analysis techniques; Advanced topics in optimization.

Specialized Courses/Elective Courses

ET610 Special Topic in Chemical Engineering 3(3-0-9)

An in-depth study on a topic of interest in the field of Chemical Engineering such as advanced reactor design, advanced process analysis, biochemical process design, principles of coal-fired power plant, advanced transport phenomena, advanced thermodynamics, and automatic control process.

ET611 Current Topics in Chemical Engineering 3(3-0-9)

A study on current interests in the field of Chemical Engineering such as nanotechnology, genetic engineering, biochemical engineering, polymer science and engineering, fuel cell and solar cell design, and alternative chemical energy resources.

ET612 Advanced Thermodynamics for Chemical Engineering 3(3-0-9)

Review of basic concepts and definitions, the first-law and energy, the second law and entropy; Availability equation for control mass/energy applications; Energy analysis of engineering cycles and Thermoeconomics; Thermodynamics of multi component and multiphase chemical system, chemical reaction equilibrium, non-ideal solution system.

ET613 Advanced Transport Phenomena 3(3-0-9)

Review on the constitutive equations of momentum, energy and mass transfer; Development of microscopic and macroscopic of momentum, energy and mass transfer equations for chemical engineering applications including non-Newtonian fluid flow and unsteady state system for momentum, energy and mass transfer.

ET614 Advanced Chemical Kinetics and Reactor Design 3(3-0-9)

Modeling and design of batch and continuous reactors via the concept of chemical kinetics and mass and energy balances including multiphase reactor design; Concept of catalysis including homogeneous and heterogeneous catalysis, support material synthesis and enzyme catalysis.

ET615 Genetic Engineering 3(3-0-9)

Basic mechanisms of genetic information and regulation of DNA replication, transcription, and translation; Methods and applications of genetic engineering, including gene manipulation and transfer techniques in prokaryotes; Emphasis on applications of recombinant DNA technology in the elucidation of gene functions and enhancing the activity of enzymes.

ET616 Advances in Polymer Science and Technology 3(3-0-9)

Thermodynamics of polymer solution and blends; Specific interactions in polymer multi-component, especially hydrogen bonding and its characterization employing Fourier Transform Infrared (FTIR) spectroscopy; Biocompatible polymers; Degradable polymers.

ET617 Petrochemical Technology 3(3-0-9)

Primary raw materials for petrochemistry; Fundamental chemistry, reactions and separations involved in the value-added processing of refinery products such as ethylene, butylenes, sulfur, medium heating value gas, etc; Use of petrochemical properties in the engineering design and operation of petroleum value-added processes; Chemistry and concerns of petrochemical pollutants.

ET618 Biochemical Engineering Fundamentals 3(3-0-9)

Overview of biological basics; Major metabolic pathways; Metabolic stoichiometry and energetics; Kinetics of substrate utilization, product formation, and biomass production in cell cultures; Transport phenomena in bioprocess systems; Selection, scale-up, operation, and control of bioreactors; Recovery and purification of products.

ET620 Special Topic in Civil Engineering 3(3-0-9)

An in-depth study on a topic of interest in the field of Civil Engineering such as computational methods in civil engineering, advanced structural analysis and design, advanced foundation engineering, maintenance of structures, and construction materials.

- ET621 Current Topics in Civil Engineering** **3(3-0-9)**
A study on current interests in the field of Civil Engineering.
- ET622 Finite Element Methods** **3(3-0-9)**
Review of variational principles; The Ritz method; Weighted residual methods; Interpolation and shape functions; Natural coordinate systems; Generic finite element formulation for linear elasticity; Numerical integrations; Standard element shape functions; Applications of finite element methods; Programming of finite element methods.
- ET623 Advanced Structural Analysis** **3(3-0-9)**
Structural modeling concepts; Static and kinematic requirements for structural systems; Discrete modeling of structural systems; Matrix force and matrix displacement methods; Direct stiffness method; Numerical methods and solution techniques appropriate to discrete structural systems; Numerical techniques for large-scale structural systems.
- ET624 Advanced Structural Design** **3(3-0-9)**
Structural design concepts; Advanced topics on ultimate limit state design and serviceability design of structures; Fatigue design of structures; Design of high-rise buildings; Design of long-span bridges.
- ET625 Foundation Design and Analysis** **3(3-0-9)**
Site Investigation; Immediate settlements; Bearing capacity of footings; Eccentric foundations; Settlement analysis; Piled foundations; Foundations on difficult soils; Earth pressure problems including retaining walls and sheet pile structures.
- ET626 Inspection, Maintenance and Retrofit of Concrete Structures** **3(3-0-9)**
Damage of concrete structures; Types of damage—mechanisms of deterioration; Inspection—inspection methods, visual inspection; Tests—nondestructive tests, partially destructive tests, chemical tests, corrosion tests, cores, load tests; Protection and repair—materials and methods for protection and repair, special techniques; Strengthening.
- ET627 Engineering Cost and Financial Management** **3(3-0-9)**
Economic decisions; Capital Rationing for investment in projects; Cost estimation—design cost estimation, construction cost estimation, total cost of engineering projects; Cash flow forecasting and budgetary control; Business financing and financial performance; Advanced financial management; Project Financing.
- ET628 Construction Management Information Systems** **3(3-0-9)**
Information systems; Information technology; Information generation and utilization for the management of construction projects; Integration of construction management software; Conceptual modeling and knowledge-based models.
- ET630 Special Topic in Electrical Engineering** **3(3-0-9)**
An in-depth study on a topic of interest in the field of Electrical Engineering such as digital communication systems, telecommunication networks, network planning and design.
- ET631 Current Topics in Electrical Engineering** **3(3-0-9)**
A study on current interests in the field of Electrical Engineering.
- ET632 Data Communication Networks** **3(3-0-9)**
Fundamentals of data communications and networking; Layered network architectures and protocols; Data transmission and coding; Error detection and correction; Local and wide area networks; Internetworking, routing, and switching; Queuing theory; Cryptography and network security.
- ET633 Network Planning and Management** **3(3-0-9)**
Fundamentals of computer and communication network planning, design, and management; Graph theory and queuing theory for network design; Network design problems and optimization; Network planning and design tools; Network management standards and protocols.
- ET634 Optical Communication Systems** **3(3-0-9)**
Fundamentals of optical signals and modern optical devices; Wavelength division multiplexing; Optical communication systems and networks; Optical network architectures; Analysis and design of optical communication systems.
- ET635 Digital Signal Processing in Communication Systems** **3(3-0-9)**
Multirate signal processing; QMF filter bank design; LPC speech coding; Subband image coding; Channel estimation/equalization; Power spectral estimation; Fundamental of adaptive filtering; Basic DSP hardware implementation.

- ET636 Digital Communication System Design 3(3-0-9)**
Digital transmission principles; Digital modulation techniques—ASK, FSK, PSK; Channel coding design—convolutional code, turbo code; Channel modeling; Synchronization; Transceiver design; Fundamentals of multiple access systems—CDMA, OFDM.
- ET640 Special Topic in Industrial Engineering and Manufacturing Systems 3(3-0-9)**
An in-depth study on a topic of interest in the field of Industrial Engineering and Manufacturing Systems such as fundamental planning and control concepts for production management and supply chains, organization of the planning, scheduling and control functions, inventory management & control systems and methodologies (MRP, MRP II, ERP, OPT, JIT).
- ET641 Current Topics in Industrial Engineering and Manufacturing Systems 3(3-0-9)**
A study on current interests in the field of Industrial Engineering and Manufacturing Systems such as design, automation, and integration of supporting systems in the manufacturing environment including flexible manufacturing systems, robotics, automated material handling systems and automated inspection systems.
- ET642 Quality Management 3(3-0-9)**
Concept of advanced quality management theory; Tools and techniques for quality improvement including SPC, six sigma, measurement system analysis, FMEA, QFD, design of experiment; Quality management system (ISO 9000)—auditing and certification; Quality economic and performance measures.
- ET643 Manufacturing Strategy 3(3-0-9)**
Role and context of manufacturing strategy; Interaction of manufacturing strategy and other company strategies; Strategic decisions within operations; System approach to strategy formulation and manufacturing system design; Cellular manufacturing concept; Make/buy analysis, sourcing and subcontracting; Manufacturing control and information systems; Company performance evaluation.
- ET644 Simulation Modeling and Analysis 3(3-0-9)**
Understanding the role of modeling and simulation in the development and improvement of business processes; Methodology and modeling; Conduct of a simulation study; Hands-on exercise of a particular software package and its application in a practical context.
- ET645 Advanced Manufacturing Processes 3(3-0-9)**
Fundamental knowledge, principles, applications, and economics of advanced manufacturing processes including electrical-discharge machining, electrochemical machining, high speed machining, laser beam machining, and water-jet machining; Adhesive and elastic bonding technologies; Principles and applications of rapid prototyping.
- ET646 Design of Operations Facilities and Systems 3(3-0-9)**
Strategic issues in the location of business in a global environment; Modern methods applied to facility layout and location design; Material handling and integrated production systems; Warehousing and logistics; Quantitative approaches to location and layout modeling; Computer-aided layout design; Personnel issues in layout design; Design for next generation manufacturing and services.
- ET647 Advanced Materials and Processes 3(3-0-9)**
Metallic materials with enhanced performance characteristics; Metal alloys; Near net shape forming processes for metals; Advanced ceramic materials—their applications and processing; New engineering polymers; Polymer composite matrix and fiber reinforcement; Polymer composite fabrication techniques; Design techniques for anisotropic composites.
- ET650 Special Topic in Mechanical Engineering 3(3-0-9)**
An in-depth study on a topic of interest in the field of Mechanical Engineering such as advanced refrigeration and cryogenics, solar design methods and applications, energy resources and technologies, principles of gas-fired power plant, air-conditioning system design, steam boiler and furnace technology, fuzzy & neural control, mechatronics, and automatic control.
- ET651 Current Topics in Mechanical Engineering 3(3-0-9)**
A study on current interests in the field of Mechanical Engineering such as advanced technologies for energy management in buildings, energy-economic modeling and policy analysis, bio-energy conversion, and applied soft computing in mechanics.
- ET652 Power Plant Engineering and Emissions 3(3-0-9)**
Fossil fuels—properties, classification, world reserves; Fossil fuel-fired power plants; Fuels and combustion; Combustion methods and boiler classifications; Boiler and power plant efficiencies and fuel consumption; Formation of major pollutants (CO₂, NO_x, SO_x and PM) in boiler furnaces—effects of fuel properties, boiler design and operating conditions; Trace elements and PAHs from firing fossil fuels; Emission control in power plants; Assessment of major emissions from boilers and power plants.

- ET653 Optimization Methods in Mechanical Engineering 3(3-0-9)**
Principles and algorithms in development of optimization problems in mechanical engineering; Methods of solving optimization problems—conventional multi-variable techniques, genetic algorithm, simulated annealing method, linear programming, etc.; Computer-aided optimization and applications.
- ET654 Advanced Heat Transfer 3(3-0-9)**
Laminar forced convection in circular, non-circular, annular cross-sectioned conduits; Turbulent forced convection over ducts and flat plates; Boiling and condensation; Analytical techniques and numerical methods for solving heat conduction problems; Conduction problems including heat sources and geometric factors; Radiation heat transfer—radiation from clouds and gases.
- ET655 Biomass for Heat and Power 3(3-0-9)**
Biomass characteristics and availability; Potential for biomass utilization in heat and power generation; Biomass combustion analysis; Boilers and gasifiers; Power generating equipment and processes; Cogeneration; Performance analysis; Financial evaluation of biomass projects; Emissions calculation and control methods.
- ET656 Computational Fluid Dynamics 3(3-0-9)**
The basic concept of fluid flow; Introduction to numerical analysis—finite difference methods, finite volume methods, techniques for solving linear equation systems, etc.; Application of CFD methods to solving the wave equation, the heat equation, Laplace's equation, Burgers' equation and simple forms of the Navier-Stokes equations; Commercial CFD software.
- ET657 Energy Modeling 3(3-0-9)**
Energy consumption and supply balance; Energy matrix; Thailand sectorial energy consumption; Energy supply and intermediate energy forms; Principles of model building; Model types; Construction of projection functions; Data requirements; Sensitivity and model verification; Policy analysis and choice of models; Linkage with other national models—macro-economic, population planning and agricultural models.
- SE611 Procurement Logistics 3(3-0-9)**
Overview of the procurement and purchasing activities in a supply chain; Supplier evaluation and selection; Pricing, negotiation, contracts; Outsourcing; Multiple sourcing; Just-in-time procurement; Inventory management; Buying decisions and plans; Cost analysis; Purchase agreements; E-procurement; Real-time internet-based e-supply chains; Reverse logistics and customer services; Supply chains for financing; Purchasing analysis of capital equipment; Institutional and government purchases.
- SE612 Laws and Regulations in Logistics 3(3-0-9)**
Logistics systems and legal framework for the domestic and international movement of goods; Operational characteristics of providers for exporting and importing services; Effects of government trade policies on global logistics.
- SE613 Transportation Systems Design and Analysis 3(3-0-9)**
Characteristics of various modes of domestic and international transportations; Vehicle types; Urban, air, ocean, highway, pick-up and delivery systems; Scheduling; Factors that influence transport demand; Costs; Market structures; Carrier pricing; Carrier operating and service characteristics and their influence on other supply chain costs and supply chain performance such as routes; labor; competition.
- SE614 Warehouse Design and Operations 3(3-0-9)**
Fundamental operations in warehousing including roles of warehousing, layout and facility design, warehouse technology such as bar codes, radio frequency identification (RFID) for inventory control systems, modern warehouse operations, classifying products, materials handling, racking and shelving, automated storage and retrieval systems (AS/RS), aisle width decision; Information technology for warehouse operations; Health and safety issues.
- SE615 Operations Scheduling 3(3-0-9)**
Sequencing and scheduling activities including: static and dynamic problems; deterministic and stochastic models, single machine processing; Parallel machine processing; Flow-shop and job-shop scheduling; Project scheduling; Workforce scheduling; Exact and heuristic solution methods and applications in logistics and supply chain systems.
- SE616 Design of Experiments in Supply Chain Systems 3(3-0-9)**
Fundamental of Design of Experiment; Simple experiment design, factorial, fractional factorial experiments; ANOVA analysis, model adequacy analysis, mixed level designs, response surface methodology and Taguchi design; Review of successful experimentation in Supply Chain Management practices.
- SE617 Accounting and Financial Management for Logistics and Supply Chain Systems 3(3-0-9)**
Profitability, liquidity; Analysis and interpretation of published financial statements; Cost behavior analysis; Profit, volume analyses; Budget preparation and control; Standard costing; Divisional, segmental performance measurement; Capital investment; Risk and uncertainty analysis; Effects of inflation and taxation; Introduction to computer based financial modeling; Good corporate governance.

Master of Engineering in Information and Communication Technology for Embedded Systems (International Program)

Curriculum Title

Master of Engineering in Information and Communication Technology for Embedded Systems (International Program)

Degree Title

Master of Engineering (Information and Communication Technology for Embedded Systems)

Applicants' Qualifications

1. The applicant must hold a bachelor's degree in engineering, science or a related field that is accepted by the SIIT Executive Committee.
2. The applicant must have a cumulative GPA of at least 2.75 or sufficient relevant research or work experience as specified by the SIIT Executive Committee.
3. The applicant must submit an official score of one of the following English language tests:
 - TU-GET,
 - TOEFL (official or institutional),
 - IELTS, or
 - an English test conducted by SIIT.

The score must not be older than two years from the date on which it was issued to the date of the application for admission to the program.

Admission Requirements

1. The applicant must pass a selection interview conducted by an SIIT Committee consisting of at least 3 faculty members.
2. Admission to the program requires approval by the SIIT Executive Committee.

Remark: Students who have inadequate knowledge in some areas, may be required to take additional courses in those areas.

Academic System

1. All courses are conducted in English. An academic year is divided into 2 semesters. Each semester consists of 16 weeks. Courses may be offered for a summer semester of at least 6 weeks duration. The total number of lecture hours required for the summer semester is the same as that for the regular semester. Enrollment for summer courses is optional.

2. Curriculum

2.1 Study Plan

The syllabus consists of prescribed coursework (24 credits) and thesis (15 credits). A total of 39 credits is required for completion of the program.

2.2 Thesis

2.2.1 A student can register for a thesis after he or she has studied for at least 2 regular semesters or has gained 12 credits with a minimum cumulative GPA of 3.00.

2.2.2 Thesis Committee

The Thesis Committee consists of the thesis advisor, who is a faculty member of SIIT, as the chairperson, the thesis co-advisor (if appointed), and one or more members. There must be at

least one member who is not affiliated with SIIT. The total number of the committee members who are not the thesis advisor or co-advisor must not be less than the total number of the thesis advisor and co-advisor. In addition, the number of committee members from SIIT must not be less than the number of external committee members. The Thesis Committee is appointed by the SIIT Executive Committee.

2.2.3 Thesis Final Defense Committee

The Thesis Final Defense Committee consists of the same members as the Thesis Committee. However, the defense must be chaired by a thesis committee member who is not the advisor or co-advisor.

2.2.4 External Examiner

The external examiner must be appointed by the SIIT Executive Committee.

Period of Study

The maximum period of study to complete the program is 4 academic years.

Registration

The student must enroll in courses and/or register for a thesis totaling at least 6 credits but not more than 12 credits per semester.

Academic Performance Evaluation and Graduation

1. Evaluation of Academic Performance

1.1 A credit will be earned only if the grade is "S" or not lower than grade "C". Grade "D" or "F" will be included in the calculation of the grade point average of each semester and for the cumulative grade point average.

1.2 Any student, who gets grade "U", "D" or "F" in a compulsory taught course, can re-enroll in that course only one more time. His or her student status will be terminated if he or she still fails to obtain grade "S" or at least "C" for the course in the second enrollment.

1.3 Thesis assessment is classified into 2 grades:

- S (Satisfactory)
- U (Unsatisfactory).

Students must get grade "S" for their theses.

2. Graduation Requirements

To graduate, students must meet the following minimum requirements:

2.1 Twenty-four credits of taught courses required by the curriculum with an accumulative GPA of at least 3.00. In addition, the grade of each of these courses must be at least "C".

2.2 Fifteen credits of thesis work and passing a thesis defense.

2.3 Approval of the thesis by the external examiner and the thesis committee.

2.4 At least one paper on thesis findings has been accepted for publication in a national journal approved by the Academic Review Committee of SIIT, or at least two papers have been accepted for publication in international conference proceedings.

2.5 Have satisfied one of the following English proficiency requirements:

- A TOEFL (official or institutional) score of at least 550 (paper-based), or 213 (computer-based), or 79 (internet-based), or
- An IELTS score of at least 6.0, or
- A TU-GET score of at least 550.

Curriculum

1. Total credits requirement

A total of 39 credits is required for completion of the program.

2. Structure and Components

2.1 Core Courses	24 Credits
2.1.1 Compulsory Courses	15 Credits
2.1.2 Compulsory Elective Courses	3 Credits
2.1.3 Technical Elective Courses	6 Credits
2.2 Master's Thesis	15 Credits
Total	39 Credits

3. Course Coding System

Sirindhorn International Institute of Technology sets up the course as follows:

3.1 Subject code consists of letters and numbers.

3.2 ICT indicates subjects in Information and Communication Technology for Embedded Systems.

SE indicates subjects in Supply Chain System Engineering and Logistics Program.

ET indicates subjects in Engineering Technology Program.

ES indicates basic subjects.

3.3 Numbers are composed of 3 digits.

- The first unit-place-digit indicates the order of subject.
- The tenth-place-digit indicates the subject group.
- The hundredth-place-digit indicates the graduate program.

4. List of courses in the curriculum

4.1 Core Courses, 24 credits

4.1.1 Compulsory Courses, 15 credits

Code	Course Title	Credits (lecture-practice-self study hrs)
ES805	Research Methodology	2(2-0-6)
ES806	Research Seminar	1(0-3-1)
ICT700	Software for Embedded Systems	3(3-0-9)
ICT710	Software Design Exercise for Embedded Systems	3(2-3-7)
ICT720	Hardware for Embedded Systems	3(3-0-9)
ICT730	Hardware Design Exercise for Embedded Systems	3(2-3-7)

4.1.2 Compulsory Elective Courses, 3 credits

Code	Course Title	Credits (lecture-practice-self study hrs)
ET600	Numerical Methods for Engineers	3(3-0-9)
ICT600	Computational Mathematics	3(3-0-9)
SE600	Decision Making and Optimization	3(3-0-9)

4.1.3 Technical Elective Courses, 6 credits

Code	Course Title	Credits (lecture-practice-self study hrs)
ICT740	Communication	3(3-0-9)
ICT750	Signal Processing	3(3-0-9)
ICT760	Intelligence Processing	3(3-0-9)
ICT770	Environment and Control Systems	3(3-0-9)
ICT780	Current Topics in Embedded Systems	3(3-0-9)
ICT781	Advanced Topics in Embedded Systems	3(3-0-9)
ICT782	Selected Topics in Embedded Systems	3(3-0-9)
ICT790	Current Topics in Information and Communication Technology	3(3-0-9)
ICT791	Advanced Topics in Information and Communication Technology	3(3-0-9)
ICT792	Selected Topics in Information and Communication Technology	3(3-0-9)

4.2 Master's Thesis

Code	Course Title	Credits
ICT800	Master's Thesis	15

Course Descriptions

Compulsory Courses

ES805 Research Methodology **2(2-0-6)**
Concepts of scientific and technological research; Statistics for research planning and research study; Data collection and data analysis; Interpretations, conclusions and recommendations of research results.

ES806 Research Seminar **1(0-3-1)**
Student-faculty interaction on advanced research topics.

ICT700 Software for Embedded Systems **3(3-0-9)**
Software programming; embedded operating systems and middle-wares such as ITRON or embedded linux; verification and testing for embedded Systems; software issues in the design of embedded systems; microcontroller architectures and peripherals; compilers and debuggers; timer and interrupt systems; interfacing of devices; software issues in communications and networking.

ICT710 Software Design Exercise for Embedded Systems **3(2-3-7)**
Overview of hardware tools (training board, JTAG interface) and software development tools (compiler, linker, debugger); software project management techniques and tools: UML, test plan, test automation, CASE; embedded operating systems: services and APIs; software development project: requirement analysis, software detailed and test case design, software coding and testing, software documentation; FPGA prototype board using sample application; FPGA logics; VHDL/verilog programming; project planning, system specification design, software coding; software implementation and verification on FPGA prototype board.

ICT720 Hardware for Embedded Systems **3(3-0-9)**
Basic digital system design; processor architecture design; VLSI design methodologies; hardware concepts on microcontroller architectures and peripherals; device interface; hardware for communications and networking.

ICT730 Hardware Design Exercise for Embedded Systems **3(2-3-7)**
Overview of hardware development tools (logic synthesis, simulation, verification); VHDL/Verilog programming language; FPGA design flow: I/O pin assignment, synchronous/asynchronous logic design, logic simulation and optimization, verification of design constraints; custom hardware development project: implementation and verification of IP cores on FPGA; software/hardware implementation and verification on FPGA prototype board; practical issues on microcontroller and FPGA.

ICT800 Master's Thesis **15 credits**
Student-faculty interaction on research and development in embedded system-related fields or information and communication technology-related fields.

Compulsory Elective Courses

ET 600 Numerical Methods for Engineers **3(3-0-9)**
Programming concepts and techniques; Modern programming languages and computational tools for engineering problems; Numerical methods as applied to practical engineering problems; Introduction to finite element methods.

ICT600 Computational Mathematics **3(3-0-9)**
Set theory; Relations; Formal proof methods; Finite automata; Regular expressions; Context-free grammar; Pushdown automata; First order logic; Theories related to counting, graphs and networks; Interplay between continuous models and their solution via discrete processes; Vector spaces, basis, dimension, eigenvalue problems, diagonalization, inner products, unitary matrices; Introduction to applied statistics and its application to intelligent systems; introduction to supervised statistical learning including discrimination methods.

SE600 Decision Making and Optimization **3(3-0-9)**
Fundamental optimization tools for quantitative analysis to develop modeling and decision-making skill in management sciences; Linear programming; Integer programming; Nonlinear programming; Goal programming; Game theory; Markov chains; Queuing theory and decision analysis techniques; Advanced topics in optimization.

Technical Elective Courses

ICT740 Communication **3(3-0-9)**
Information theory; signal processing; communication systems; data and digital communication concepts; theory and techniques in data communications: transmission, encoding, decoding, error detection, error correction, link control, networking, and standards; communication hardware and software; synchronization subsystems; time-division multiple-access systems; code-division multiple-access systems.

ICT750 Signal Processing 3(3-0-9)

Digital signal processing theory; audio processing; video processing; discrete-time signals and systems; linear time-invariant systems and their properties; sampling of continuous-time signals and convolution; IIR and FIR filter designs; discrete Fourier transforms; fast Fourier transform algorithms; relations between Fourier transform (FT), discrete-frequency FT (DFFT) or Fourier series discrete-time FT (DTFT), and discrete FT (DFT: discrete both time & frequency); Speech coding and decoding; image coding and decoding; transmultiplexers; filter banks; channel estimation; channel equalization; synchronization; array processing; power spectral estimation; adaptive filtering; ADC and DAC algorithms.

ICT760 Intelligence Processing 3(3-0-9)

Human interface; computer graphics; artificial intelligence (AI); concept and design of human-machine interface; trends of human interface design; graphic user interface, interactive software design; hardware technology for human interface; basic descriptive geometry: points, lines, planes and their relationships; Methods of creating, storing, manipulating, presenting and animating two and three dimensional objects; overview of current research and application of artificial intelligence; introduction to AI languages such as Prolog or LISP; search techniques; knowledge representation, reasoning and inference; machine learning; expert systems.

ICT770 Environment and Control Systems 3(3-0-9)

Control systems theory; environment control systems; power management systems; Laplace transforms; control system description and block diagrams; dynamics of typical controlled systems; development and simplification of transfer functions; analytic tools for predicting system response and performance; root locus design techniques.

ICT780 Current Topics in Embedded Systems 3(3-0-9)

Topics of current interest in the field of embedded systems.

ICT 781 Advanced Topics in Embedded Systems 3(3-0-9)

Advanced topics which may be continuation of embedded system-related topics offered in other lower-level courses.

ICT782 Selected Topics in Embedded Systems 3(3-0-9)

Topics selected by the instructor to prepare students to continue their research in embedded systems.

ICT790 Current Topics in Information and Communication Technology 3(3-0-9)

Topics of current interest in the field of information and communication technology

ICT791 Advanced Topics in Information and Communication Technology 3(3-0-9)

Advanced topics which may be continuation of a topic offered in other lower-level courses of information and communication technology.

ICT792 Selected Topics in Information and Communication Technology 3(3-0-9)

Topics selected by the instructor to prepare students to continue their research in information and communication technology.

Master of Engineering in Logistics and Supply Chain Systems Engineering (LSCSE) (International Program)

Curriculum Title

Master of Engineering in Logistics and Supply Chain Systems Engineering (LSCSE) (International Program)

Degree Title

Master of Engineering (Logistics and Supply Chain Systems Engineering)

Applicants' Qualifications

1. The applicant must hold a bachelor's degree in engineering, science or a related field that is accepted by the SIIT Executive Committee.
2. The applicant must have a cumulative GPA of at least 2.75 or sufficient relevant research or work experience as specified by the SIIT Executive Committee.
3. The applicant must submit an official score of one of the following English language tests:
 - TU-GET,
 - TOEFL (official or institutional),
 - IELTS, or
 - an English test conducted by SIIT.

The score must not be older than two years from the date on which it was issued to the date of the application for admission to the program.

Admission Requirements

1. The applicant must pass a selection interview conducted by an SIIT Committee consisting of at least 3 faculty members.
2. Admission to the program requires approval by the SIIT Executive Committee.

Remark: Students who have inadequate knowledge in some areas, may be required to take additional courses in those areas.

Academic System

1. All courses are conducted in English. An academic year is divided into 2 semesters. Each semester consists of 16 weeks. Courses may be offered for a summer semester of at least 6 weeks duration. The total number of lecture hours required for the summer semester is the same as that for the regular semester. Enrollment for summer courses is optional.

2. Curriculum

2.1 Study Plan

The syllabus consists of prescribed coursework (24 credits) and thesis (15 credits). A total of 39 credits is required for completion of the program.

2.2 Thesis

2.2.1 A student can register for a thesis after he or she has studied for at least 2 regular semesters or has gained 12 credits with a minimum cumulative GPA of 3.00.

2.2.2 Thesis Committee

The Thesis Committee consists of the thesis advisor, who is a faculty member of SIIT, as the chairperson, the thesis co-advisor (if appointed), and one or more members. There must be at least one member who is not affiliated with SIIT. The total number of the committee members who are not the thesis advisor or co-advisor must not be less than the total number of the thesis advisor and co-advisor. In addition, the number of committee members from SIIT must not be less

than the number of external committee members. The Thesis Committee is appointed by the SIIT Executive Committee.

2.2.3 Thesis Final Defense Committee

The Thesis Final Defense Committee consists of the same members as the Thesis Committee. However, the defense must be chaired by a thesis committee member who is not the advisor or co-advisor.

2.2.4 External Examiner

The external examiner must be appointed by the SIIT Executive Committee.

Period of Study

The maximum period of study to complete the program is 4 academic years.

Registration

The student must enroll in courses and/or register for a thesis totaling at least 6 credits but not more than 12 credits per semester.

Academic Performance Evaluation and Graduation

1. Evaluation of Academic Performance

1.1 A credit will be earned only if the grade is "S" or not lower than grade "C". Grade "D" or "F" will be included in the calculation of the grade point average of each semester and for the cumulative grade point average.

1.2 Any student, who gets grade "U", "D" or "F" in a compulsory taught course, can re-enroll in that course only one more time. His or her student status will be terminated if he or she still fails to obtain grade "S" or at least "C" for the course in the second enrollment.

1.3 Thesis assessment is classified into 2 grades:

- S (Satisfactory)
- U (Unsatisfactory).

Students must get grade "S" for their theses.

2. Graduation Requirements

To graduate, students must meet the following minimum requirements:

2.1 Twenty-four credits of taught courses required by the curriculum with an accumulative GPA of at least 3.00. In addition, the grade of each of these courses must be at least "C".

2.2 Fifteen credits of thesis work and passing a thesis defense.

2.3 Approval of the thesis by the external examiner and the thesis committee.

2.4 At least one paper on thesis findings has been accepted for publication in a national journal approved by the Academic Review Committee of SIIT, or at least two papers have been accepted for publication in international conference proceedings.

2.5 Have satisfied one of the following English proficiency requirements:

- A TOEFL (official or institutional) score of at least 550 (paper-based), or 213 (computer-based), or 79 (internet-based), or
- An IELTS score of at least 6.0, or
- A TU-GET score of at least 550.

Curriculum

1. Total credits requirement

A total of 39 credits is required for completion of the program.

2. Structure and Components

2.1	Core Courses	24 Credits
2.1.1	Compulsory Courses	12 Credits
2.1.2	Technical Elective Courses	12 Credits
2.2	Master's Thesis	15 Credits
	Total	39 Credits

3. Course Coding System

Sirindhorn International Institute of Technology sets up the course as follows:

- 3.1 Subject code consists of letters and numbers.
- 3.2 ICT indicates subjects in Information and Communication Technology for Embedded Systems.
 SE indicates subjects in Supply Chain System Engineering and Logistics Program.
 ET indicates subjects in Engineering Technology Program.
 ES indicates basic subjects.
- 3.3 Numbers are composed of 3 digits.
- The first unit-place-digit indicates the order of subject.
 - The tenth-place-digit indicates the subject group.
 - The hundredth-place-digit indicates the graduate program.

4. List of courses in the curriculum

4.1 Core Courses, 24 credits

4.1.1 Compulsory Courses, 12 credits

Code	Course Title	Credits (lecture-practice-self study hrs)
SE600	Decision Making and Optimization	3(3-0-9)
or		
ET600	Numerical Methods for Engineers	3(3-0-9)
or		
ICT600	Computational Mathematics	3(3-0-9)
SE601	Logistics and Supply Chain Systems	3(3-0-9)
SE602	Production Logistics	3(3-0-9)
ES805	Research Methodology	2(2-0-6)
ES806	Research Seminar	1(0-3-1)

4.1.2 Technical Elective Courses, 12 credits

Code	Course Title	Credits (lecture-practice-self study hrs)
SE61x	Technical Elective*	3(3-0-9)
SE61x	Technical Elective*	3(3-0-9)
SE61x	Technical Elective*	3(3-0-9)
SE61x	Technical Elective*	3(3-0-9)

* List of Technical Electives: select 4 courses (12 credits) from the following courses:

SE610	Simulation Modeling and Analysis in Supply Chain	3(3-0-9)
SE611	Procurement Logistics	3(3-0-9)
SE612	Laws and Regulations in Logistics	3(3-0-9)
SE613	Transportation Systems Design and Analysis	3(3-0-9)
SE614	Warehouse Design and Operations	3(3-0-9)
SE615	Operations Scheduling	3(3-0-9)
SE616	Design of Experiments in Supply Chain Systems	3(3-0-9)
SE617	Accounting and Financial Management for Logistics and Supply Chain Systems	3(3-0-9)
SE618	Special Topic in Logistics and Supply Chain Systems	3(3-0-9)
SE619	Current Topics in Logistics and Supply Chain Systems	3(3-0-9)

4.2 Master's Thesis

Code	Course Title	Credits
SE800	Master's Thesis	15

Course Descriptions

Compulsory Courses

ES805 Research Methodology **2(3-0-6)**
Concepts of scientific and technological research; Statistics for research planning and research study; Data collection and data analysis; Interpretations, conclusions and recommendations of research results.

ES806 Research Seminar **1(0-3-1)**
Student-faculty interaction on advanced research topics.

ET600 Numerical Methods for Engineers **3(3-0-9)**
Programming concepts and techniques; Modern programming languages and computational tools for engineering problems; Numerical methods as applied to practical engineering problems; Introduction to finite element methods.

ICT600 Computational Mathematics **3(3-0-9)**
Set theory; Relations; Formal proof methods; Finite automata; Regular expressions; Context-free grammar; Pushdown automata; First order logic; Theories related to counting, graphs and networks; Interplay between continuous models and their solution via discrete processes; Vector spaces, basis, dimension, eigenvalue problems, diagonalization, inner products, unitary matrices; Introduction to applied statistics and its application to intelligent systems; Introduction to supervised statistical learning including discrimination methods.

SE600 Decision Making and Optimization **3(3-0-9)**
Fundamental optimization tools for quantitative analysis to develop modeling and decision-making skill in management sciences; Linear programming; Integer programming; Nonlinear programming; Goal programming; Game theory; Markov chains; Queuing theory and decision analysis techniques; Advanced topics in optimization.

SE601 Logistics and Supply Chain Systems **3(3-0-9)**
Principle of domestic and international logistics and supply chain systems, logistics, transportation, production planning, inventory control, purchasing and procurement, packaging, supply chain integration; Information technologies and management information system/development and analysis, model-based, data-based, and knowledge-based systems and knowledge engineering; Newly emerging technologies in supply chain systems such as radio frequency identification (RFID); Global supply chain models, government intervention and regulations, international transportation and risk analysis.

SE602 Production Logistics **3(3-0-9)**
Design, analysis and implementation of enterprise-wide resource and production planning and control systems; Demand forecasting, aggregate planning; Decision support models for production planning; Master scheduling; Shop floor control; Inventory control and policy; Maintenance and reliability in engineering systems; Application of information technologies such as ERP and MRP II to production and operations planning and control.

SE800 Master's Thesis **15 credits**
Students will conduct research studies in the area of logistics and supply chain systems engineering under the supervision of their thesis advisor. Research areas include production logistics analysis (production planning, inventory control, maintenance, reliability, scheduling specifically for and limited to logistics and supply chain systems), procurement logistics analysis (e-procurement, outsourcing, multiple sourcing), distribution center and warehouse system analysis, transportation systems design and analysis specifically for logistics and supply chain systems. Research output must lead to publication in international conference proceedings, or national/international refereed journal.

Technical Elective Courses

SE610 Simulation Modeling and Analysis in Supply Chain **3(3-0-9)**
Understanding the role of modeling and simulation in the development and improvement of logistics and supply chain operations; Methodology and modeling; Conducting a simulation study; Hands-on exercise of a particular software package and its application in a practical context.

SE611 Procurement Logistics **3(3-0-9)**
Overview of the procurement and purchasing activities in a supply chain; Supplier evaluation and selection; Pricing, negotiation, contracts; Outsourcing; Multiple sourcing; Just-in-time procurement; Inventory management; Buying decisions and plans; Cost analysis; Purchase agreements; E-procurement; Real-time internet-based e-supply chains; Reverse logistics and customer services; Supply chains for financing; Purchasing analysis of capital equipment; Institutional and government purchases.

SE612 Laws and Regulations in Logistics 3(3-0-9)

Logistics systems and legal framework for the domestic and international movement of goods; Operational characteristics of providers for exporting and importing services; Effects of government trade policies on global logistics.

SE613 Transportation Systems Design and Analysis 3(3-0-9)

Characteristics of various modes of domestic and international transportations; Vehicle types; Urban, air, ocean, highway, pick-up and delivery systems; Scheduling; Factors that influence transport demand; Costs; Market structures; Carrier pricing; Carrier operating and service characteristics and their influence on other supply chain costs and supply chain performance such as routes; labor; competition.

SE614 Warehouse Design and Operations 3(3-0-9)

Fundamental operations in warehousing including roles of warehousing, layout and facility design, warehouse technology such as bar codes, radio frequency identification (RFID) for inventory control systems, modern warehouse operations, classifying products, materials handling, racking and shelving, automated storage and retrieval systems (AS/RS), aisle width decision; Information technology for warehouse operations; Health and safety issues.

SE615 Operations Scheduling 3(3-0-9)

Sequencing and scheduling activities including: static and dynamic problems; deterministic and stochastic models, single machine processing; Parallel machine processing; Flow-shop and job-shop scheduling; Project scheduling; Workforce scheduling; Exact and heuristic solution methods and applications in logistics and supply chain systems.

SE616 Design of Experiments in Supply Chain Systems 3(3-0-9)

Fundamental of Design of Experiment; Simple experiment design, factorial, fractional factorial experiments; ANOVA analysis, model adequacy analysis, mixed level designs, response surface methodology and Taguchi design; Review of successful experimentation in Supply Chain Management practices.

SE617 Accounting and Financial Management for Logistics and Supply Chain Systems 3(3-0-9)

Profitability, liquidity; Analysis and interpretation of published financial statements; Cost behavior analysis; Profit, volume analyses; Budget preparation and control; Standard costing; Divisional, segmental performance measurement; Capital investment; Risk and uncertainty analysis; Effects of inflation and taxation; Introduction to computer based financial modeling; Good corporate governance.

SE618 Special Topic in Logistics and Supply Chain Systems 3(3-0-9)

Advanced topics in integrated logistics and supply chain operations; Procurement strategies and strategic sourcing; Dynamic pricing and revenue management tactics; Mitigation of supply chain risk through supply contracts; Risk analysis in global environment; Strategic outsourcing of supply chain functions and operations; Management and operation of third party logistics providers; Management of supply chain security.

SE619 Current Topics in Logistics and Supply Chain Systems 3(3-0-9)

A study on current interests in the field of logistics and supply chain systems and operations.

Master of Science in Engineering or Technology (International Program)

Curriculum Title

Master of Science in Engineering or Technology

Degree Title

Master of Science in Engineering or Master of Science in Technology

Admission Requirements

- Bachelor degree in engineering or science from institutions approved by the SIIT Executive Committee.
- Overall cumulative GPA of at least 2.75 with research experience, or overall cumulative GPA of at least 3.00, or top 20% of the class.
- Two letters of recommendations.
- The applicant must submit an official score of one of the following English language tests:
 - TU-GET,
 - TOEFL (official or institutional),
 - IELTS, or
 - an English test conducted by SIIT.

The score must not be older than two years from the date on which it was issued to the date of the application for admission to the program.

- Approval of the admission by the SIIT Executive Committee.

Graduation Requirements

A candidate for a master of science in engineering or technology program must successfully complete 39 credits and meet other requirements as follows:

1. Twelve credits of taught courses (see the course descriptions) with a GPA of at least 3.00 or equivalent.
2. Twenty seven credits of thesis.
3. At least one paper on thesis results must have been accepted for publication in a reputable international journal approved by the Academic Review Committee. The following alternate requirements may be used: one paper in a national journal approved by the Academic Review Committee and one paper in a refereed international conference. To graduate, one paper must have been accepted and the other must have been submitted.
4. Approval of the thesis by an external examiner appointed by the SIIT Executive Committee.
5. Satisfying one of the following English proficiency requirements: TOEFL (official or institutional) not less than **550** marks (or **213** marks for computer-based test or **79** marks for Internet-based test), or IELTS not less than **6.0**, or pass the TU-GET with a score of at least **550**. Each student is expected to satisfy this English requirement within one year of enrolment.

Students with insufficient background may be required to take some basic courses and obtain satisfactory grades, as determined by the thesis committee.

Thesis Committee

The Thesis Committee consists of a) a faculty member of SIIT, who is the student's advisor, as the chairperson, b) two or more members, at least one of whom is a faculty member of SIIT, and c) a co-advisor if necessary. There must be at least one member who is not affiliated with SIIT.

Thesis Final Defense Committee

The Thesis Final Defense Committee consists of the same members as the Thesis Committee. However, the defense must be chaired by a thesis committee member who is not the advisor or co-advisor.

External Examiner

The external examiner must be appointed by the SIIT Executive Committee.

Period of Study

The maximum period of study to complete the program is 4 academic years.

Taught Courses

		Credits
ES801	Advanced Engineering Mathematics	3
	<i>or</i> ES811 Theory of Computation	3
	<i>or</i> ET600 Numerical Methods for Engineers	3
	<i>or</i> ICT600 Computational Mathematics	3
	<i>or</i> SE600 Decision Making and Optimization	3
ES802	Research Methodology	3
	<i>or</i> ES805 Research Methodology	2
	and	
	ES806 Research Seminar	1
ES803	Special Study	3
ES804	Selected Topic	3

Course Descriptions

ES801 Advanced Engineering Mathematics 3(3-0-9)

Mathematics for solving engineering problems; ordinary differential equations of higher order; partial differential equations; integral equations; numerical analysis; optimization techniques.

ES802 Research Methodology 3(3-0-9)

Concept of scientific and technological research; statistics for research planning and research study; data collection and data analysis; interpretations, conclusions and recommendations of research results.

ES803 Special Study 3(3-0-9)

Each student is required to undertake an in-depth study of an approved topic which will lead to formulation of thesis proposal. The study will be supervised by a faculty member. A written report and oral presentation have to be given at the end of the semester to the student thesis committee.

ES804 Selected Topic 3(3-0-9)

Each student is required to select an advanced engineering or technological course relevant to the student's thesis. The course may be offered by SIIT or any other reputable graduate school but has to be approved by the student thesis committee.

ES805 Research Methodology 2(2-0-6)

Concept of scientific and technological research; statistics for research planning and research study; data collection and data analysis; interpretations, conclusions and recommendations of research results.

ES806 Research Seminar 1(0-3-1)

Student-faculty interaction on advanced research topics.

ES811 Theory of Computation 3(3-0-9)

Set theory; relations; formal proof methods; finite automata; regular expressions; context-free grammar; pushdown automata; Turing machines; uncomputability; computational complexity; first-order logic.

ES898 Master's Thesis 27 Credits

ET600 Numerical Methods for Engineers **3(3-0-9)**
Programming concepts and techniques; Modern programming languages and computational tools for engineering problems; Numerical methods as applied to practical engineering problems; Introduction to finite element methods.

ICT600 Computational Mathematics **3(3-0-9)**
Set theory; relations; Formal proof methods; Finite automata; Regular expressions; Context-free grammar; Pushdown automata; First order logic; Theories related to counting, graphs and networks; Interplay between continuous models and their solution via discrete processes; Vector spaces, basis, dimension, eigenvalue problems, diagonalization, inner products, unitary matrices; Introduction to applied statistics and its application to intelligent systems; introduction to supervised statistical learning including discrimination methods.

SE600 Decision Making and Optimization **3(3-0-9)**
Fundamental optimization tools for quantitative analysis to develop modeling and decision-making skill in management sciences; Linear programming; Integer programming; Nonlinear programming; Goal programming; Game theory; Markov chains; Queuing theory and decision analysis techniques; Advanced topics in optimization.

Doctoral Degree Program (International Program)

Admission Requirements

- Graduate of Master Degree in Engineering or Science or related fields with very good academic record and/or thesis experience; or Master Degree student of SIIT with at least one international journal publication.
- Two letters of recommendations.
- The applicant must submit an official score of one of the following English language tests:
 - TU-GET,
 - TOEFL (official or institutional),
 - IELTS, or
 - an English test conducted by SIIT.

The score must not be older than two years from the date on which it was issued to the date of the application for admission to the program.

- Approval of the admission by the SIIT Executive Committee.

Graduation Requirements

- 1.1 A candidate for doctor of philosophy who has a master's degree must successfully complete 60 credits comprising at least 12 credits of coursework and at least 48 credits of thesis.
- 1.2 A candidate for doctor of philosophy who has only a bachelor's degree must successfully complete 90 credits, comprising at least 12 credits of coursework and at least 75 credits of thesis.
2. Each required course must have a "Satisfactory" grade, or at least a B grade.
3. At least two research publications accepted by reputable international journals, at least one of which must be listed in an international database with impact factor. It is recommended that there is at least one paper presented at a refereed international conference.
4. Approval of thesis by the thesis committee and the external examiner.
5. Satisfying one of the following English proficiency requirements: TOEFL (official or institutional) not less than **550** marks or **213** for computer-based test or **79** for Internet-based test, or IELTS not less than **6.0**, or TU-GET not less than **550**. Each student is expected to satisfy this English requirement within one year of enrolment. This requirement is waived for students who have already satisfied the same requirement in the Master's degree program at SIIT.

Students with insufficient background may be required to take some basic courses and obtain satisfactory grades, as determined by the thesis committee.

Transferred Credits

A student in the doctoral program may request to have credits transferred from the courses taken during the master's degree program. A maximum of 9 credits from the master's degree courses can be accredited for Advanced Engineering Mathematics or Theory of Computation or Numerical Methods for Engineers or Computational Mathematics or Decision Making and Optimization, Research Methodology, Research Seminar, and Selected Topic. The credits for Selected Topic must be from a course related to the student's research and must not have been used previously to satisfy the requirements of a degree. Courses which may be transferred are: courses instructed in English with a grade of B or better, courses instructed in a non-English language with a grade of B+ or better, courses instructed in a non-English language with a grade of B or better if the student has already passed the English proficiency requirement.

A student who enrolls in the doctoral program by upgrading from the SIIT master's degree program without receiving the master's degree may request to transfer up to 39 credits of coursework and thesis.

Thesis Committee

The Thesis Committee consists of

- Two advisors comprising one principal advisor, who is an SIIT faculty member, and one co-advisor.
- Two or more committee members with at least one being a faculty member of SIIT and at least one member who is not affiliated with SIIT.

Thesis Final Defense Committee

The Thesis Final Defense Committee consists of the same members as the Thesis Committee. However, the defense must be chaired by a thesis committee member who is not the advisor or co-advisor.

External Examiner

The external examiner must be appointed by the SIIT Academic Review Committee (ARC).

Maximum Period of Study

Full-time students: 5 years (with MS), 6 years (without MS)

Course Descriptions

ES801 Advanced Engineering Mathematics 3(3-0-9)
Mathematics for solving engineering problems; ordinary differential equations of higher order; partial differential equations; integral equations; numerical analysis; optimization techniques.

ES802 Research Methodology 3(3-0-9)
Concept of scientific and technological research; statistics for research planning and research study; data collection and data analysis; interpretations, conclusions and recommendations of research results.

ES803 Special Study 3(3-0-9)
Each student is required to undertake an in-depth study of an approved topic which will lead to formulation of thesis proposal. The study will be supervised by a faculty member. A written report and oral presentation have to be given at the end of the semester to the student thesis committee.

ES804 Selected Topic 3(3-0-9)
Each student is required to select an advanced engineering or technological course relevant to the student's thesis. The course may be offered by SIIT or any other reputable graduate school but has to be approved by the student thesis committee.

ES805 Research Methodology 2(2-0-6)
Concept of scientific and technological research; statistics for research planning and research study; data collection and data analysis; interpretations, conclusions and recommendations of research results.

ES806 Research Seminar 1(0-3-1)
Student-faculty interaction on advanced research topics.

ES811 Theory of Computation 3(3-0-9)
Set theory; relations; formal proof methods; finite automata; regular expressions; context-free grammar; pushdown automata; Turing machines; uncomputability; computational complexity; first-order logic.

ES899 Doctoral Dissertation 48 or 75 Credits
(A candidate for doctor of philosophy who has a master's degree must successfully complete at least 48 credits of thesis. A candidate for doctor of philosophy who has only a bachelor's degree must successfully complete at least 75 credits of thesis.)

ET600 Numerical Methods for Engineers 3(3-0-9)
Programming concepts and techniques; Modern programming languages and computational tools for engineering problems; Numerical methods as applied to practical engineering problems; Introduction to finite element methods.

ICT600 Computational Mathematics 3(3-0-9)
Set theory; relations; Formal proof methods; Finite automata; Regular expressions; Context-free grammar; Pushdown automata; First order logic; Theories related to counting, graphs and networks; Interplay between continuous models and their solution via discrete processes; Vector spaces, basis, dimension, eigenvalue problems, diagonalization, inner products, unitary matrices; Introduction to applied statistics and its application to intelligent systems; introduction to supervised statistical learning including discrimination methods.

SE600 Decision Making and Optimization 3(3-0-9)
Fundamental optimization tools for quantitative analysis to develop modeling and decision-making skill in management sciences; Linear programming; Integer programming; Nonlinear programming; Goal programming; Game theory; Markov chains; Queuing theory and decision analysis techniques; Advanced topics in optimization.
